EXPERIENCE

Wootzapp | Chromium Developer Intern

June 2025 – Present

Contributing to the development of a custom Android browser built on Chromium. Working on low-level Chromium C++ codebase to implement browser features, UI enhancements, and performance optimizations. Collaborating on Android-side integrations to ensure seamless browser functionality across Chromium components. Skills used: C++, Chromium, Android, Java, GN/Ninja build systems

Freelance Project

Nov 2024 - Mar 2025

Developed and delivered a multi-platform DJ mixing software with an intuitive UI and real-time audio manipulation features. Focused on creating a seamless user experience with cross-platform compatibility and low-latency performance. Skills used: JUCE, C++, UI/UX Design, and Audio Processing.

ChatWise UK Limited | iOS Developer Intern

Apr 2024 - Nov 2024

Developed multiple features for a social media application, implemented APIs in the frontend, and optimized app performance. Performed debugging and optimizations on an XMPP-based chat system. Skills used: Swift, Objective-C, XMPP Protocol, XML, Core Data, and RESTful APIs.

Namate24 Training Services (OPC) Private Limited

Nov 2023 - May 2024

App Development Instructor

Developed and delivered a 6-month Swift boot camp, teaching foundational mobile app development. Provided mentorship to 2 students empowering them to overcome challenges and complete the boot camp. Skills used: Swift, mentoring, mobile app development.

EDUCATION

Computer Engineering | Delhi Technological University (2022 - 2026)

Aug 2022 - Present

XII (CBSE) | GS Convent School, Delhi

2022

TECHNICAL SKILLS

iOS Development

Swift, SwiftUI, UIKit, Combine, Core Data, Xcode

Android Development

Java, NDK, Android Studio

Chromium/C++ Development

C++, Chromium, Ninja, GN-Build systems

Cross-Platform Desktop & Audio Development (JUCE):

JUCE Framework, C++, Audio Engineering, Cross-platform Integration

Backend & API Development:

Node.js, Django, REST APIs, Docker

PROJECTS

Skin-Talk [Repository link](#)

A **hackathon-winning project** that uses machine learning to detect skin conditions.

Developed the backend, implementing server chaining to integrate a JavaScript-based server and a Python-based server.

Enabled ML processing in Python, while the JavaScript server handled user communication.

Technologies used: Python, JavaScript, machine learning, server chaining.
